

Where Students Hide Vaping Devices

Hiding in Plain Sight

Student vaping has become a widespread issue, with students finding ingenious ways to conceal their vaping devices in everyday objects. From hollowed-out pens and highlighters to USB drives and even fake asthma inhalers, these discreet devices often go unnoticed, allowing students to vape discreetly in plain sight.

Vaping Device Concealment Methods

- **PENS**

Hollowed-out ballpoint pens or markers that can be used to conceal small vaping devices.

- **USB DRIVES**

USB drives with hidden compartments to store and conceal vape pens and cartridges.

- **CLOTHING**

Specific clothing items like hoodies, skirts, and pants with hidden pockets or compartments to hide vaping devices.

- **MAKEUP CASES**

Makeup cases and containers that have been modified to discreetly store and conceal vaping devices.

- **PORTABLE CHARGERS**

Portable power banks and chargers that have been modified to conceal vaping devices inside.

Strategies for Detection and Prevention

- **ROUTINE INSPECTIONS AND AWARENESS**

- Conduct random locker and bathroom checks.

- Train staff to recognize common hiding spots.

- Encourage anonymous student reporting.

- **STUDENT EDUCATION AND ENGAGEMENT**

- Implement vaping prevention education in health classes

- Provide real-life testimonials on vaping dangers.

- Offer counseling and support for students struggling with Nicotine addiction.

- **PARENTAL INVOLVEMENT**

- Educate parents on common hiding spots and warning signs.

- Encourage open discussions between parents and children about vaping risks.
